

## **LeoStar-I The Ultimate Astrological Software**

LeoStar-I is the most comprehensive software available on Vedic Astrology. It contains calculations and predictions based on different systems of astrology, planet and house readings, dasha and transit predictions, yearly, monthly and daily predictions, along with a versatile system for input of birth details and its storage. It contains predictions on Lal Kitab, Tajik system, KP system, Muhurtha, Horary astrology, Panchang, horoscope matching and much more.

LeoStar-I is the internet version of the most popular Vedic software LeoStar which does not require any hardware key for running it. It needs only the internet connection for this purpose. Further, you can have the latest version for no extra cost. You can download the latest version any time and install to run it. Further you need not pay full in one time. You can buy the license to run the software for a month or for the life (10 years). All this you can do without anybody's interference.

The purchase and installation process of this software is very simple. Just download the software from our website. Install it to your desktop / laptop and register the software by just providing your mobile no and email id. The Software will start working but it will be in free mode for 1 month. In the free mode you can make simple horoscopes and do match making. Other packages or advance contents will be in the demo mode i.e. on some fixed date. You can any time make the payment by just clicking on "LeoUpdate" icon in the LeoStar-I software or directly from our website [www.futurepointindia.com](http://www.futurepointindia.com). Once you have made the payment, you will be asked to activate the paid mode software and after activation the software will start working in the full mode as per languages and packages license purchased by you.
